EaP countries:

Azerbaijan, Armenia, Georgia, Republic of Moldova, Belarus, Ukraine

EU contribution: € 1 400 000

Project website: www.eu4energy.eu

Project description:

The EU4Energy communication project was launched in June 2017 with the objective to increase the visibility of EU-funded bilateral and regional assistance in the energy field. It covers the six Eastern Partnership countries.

The EU4Energy initiative aims to show case the benefits of EU support and to highlight the impact of EU energy cooperation on the daily lives of citizens in the beneficiary countries. It operates under the umbrella of the OPEN 'EU NEIGHBOURS east' communication project and builds on the communication platforms/channels already developed under this project.

Expected results:

- Coordination/communication support to EU-funded projects in the energy field;
- Provision of real time information through various channels;
- Development and implementation of public awareness campaigns and thematic events;
- Enhancing media relations.
