Project description:

EU has been supporting Georgia's ambitious public administration reforms. This project aims at elaboration of sustainable public administration reform (PAR) monitoring system, by developing external monitoring frameworks based on best practices, supporting CSOs in practical application of the frameworks and creating PAR monitoring platform.

The project:

- Gathers and analyzes monitoring and evaluation best-practices related to PAR monitoring
- Develops sector-specific PAR monitoring frameworks and indices and engages in PAR monitoring
- Develops monitoring and evaluation platform concept, ensures testing with stakeholders and afterwards launches the platform
- Trains wider Civil Society Organization (CSO) network on PAR oversight
- Engages CSOs, Parliament, State audit Office and other actors in PAR oversight process
- Develops and implements PAR campaign through social and traditional media channels
- Organizes PAR-related discourses on implementation gaps and presenting performance reports.

Expected results:

- Assessment frameworks prepared for policy planning, public service delivery, and public finances management;
- Newly developed assessment frameworks introduced and institutionalised by applying them in practical monitoring and evaluation;
- PAR actualisation and promotion through regular reporting of various PAR monitoring data and relevant campaigning;
- Interactive, user-friendly PAR Monitoring and Evaluation Platform (PARMEP) developed, presenting monitoring results and engaging stakeholders.
